

the STEADYTONES

explosive reggay

Ska, Rocksteady & Early Reggae: the independence of Jamaica in 1962 set free a musical creativity of which not only the island still profits today. The Steadytones recreate this golden age, making it tangible, audible and perceptible. Whether with their original compositions with attention to detail that sometimes draw from Dub & Soul, or with reinterpretations of almost forgotten treasures from the depths of the Steadytones records collection: the Steadytones bring you back into the future, on dancing feet.

Bandmembers:

Florian Strober – Drums, Vocals
Maxwell – Guitar, Vocals
